

Visual Mind™ Add-In Mind2Chart

Mind2Chart for Visual Mind™ is a project planning add-in that enables you to manage projects using **Visual Mind™** instead of a number of different applications. **Mind2Chart** includes all of the commonly used Project Management techniques applicable for small and middle sized projects.

Mind2Chart is an extremely easy-to-use project planning add-in that enables you to manage projects using **Visual Mind™**. Everything you need is right at hand and the add-in is so quick and intuitive that you will focus on your tasks, not the process or tool.

Mind2Chart lets you take advantage of 3 powerful techniques:

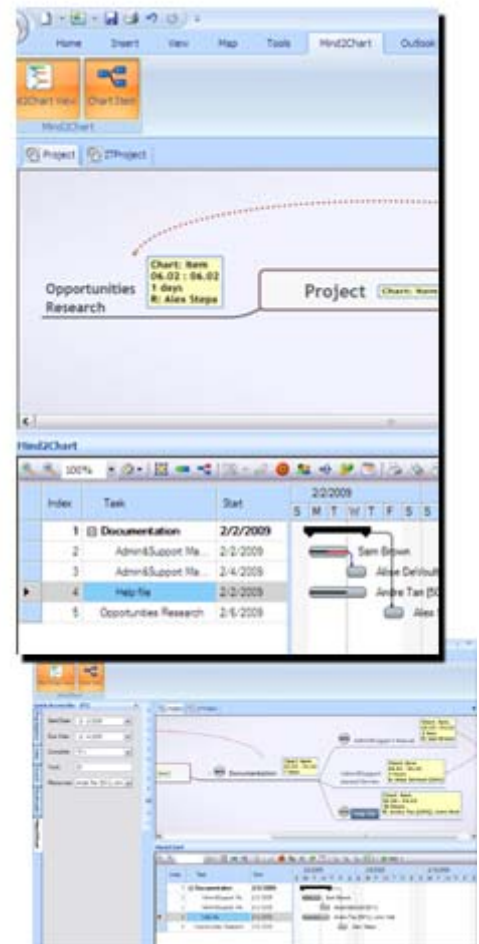

- Mind Mapping
- Work Breakdown Structure
- Gantt charting

Mind2Chart for Visual Mind converts the resulting map of your brainstorm into the Project Plan in just a couple of clicks.

- Mark branches of your project scope as **tasks** – and you will get a **grouped structure** of tasks.
- Establish **dependencies** between them: define when tasks should start and/or finish dependently on others.
- Make project **schedule** – set key dates, observe duration, estimate time. Specify holidays and working schedule.
- Everything is visualized with **Gantt chart** view.
- Allocate **resources**; see the obtained project duration and key dates caused by the current resource allocation and loading. Take into account **personal schedules**.
- **Optimize** your Project Schedule according to resources costs and schedules.
- Set completeness percents, **monitor** project implementation.
- **Share** the information with your team and customers.
- Create **reports** with only a click – to overview a project and report to the stakeholders.

What else do you get?

- Two-way instant **synchronization** with the Visual Mind map.
- Reports, Gantt chart, Schedule – in **printable** form.
- Customizable Master Schedule as well as personal Resource Schedules.
- **Total Cost** Report as the base for invoices.
- Plus a lot more.
